READING ROOM

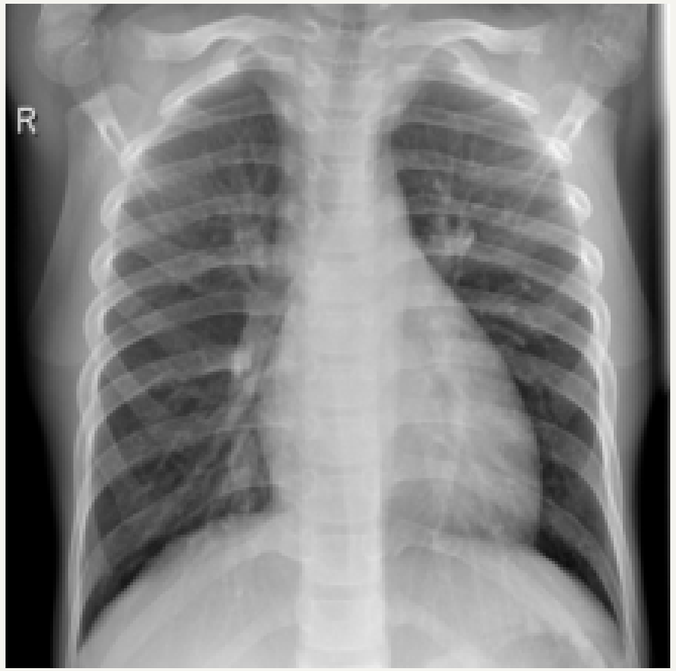

Pneumonia from chest X-rays

Samarth Shekhar Meghavi Rao
Rachit Kumar Harshal Nerpagar

Computer Vision / M1-M5

Two dataset labels

Normal

Pneumonia

We predict a benchmark label.

Our project journey

87.18%

Cached 5

85.74%

Audit 15

92.15%

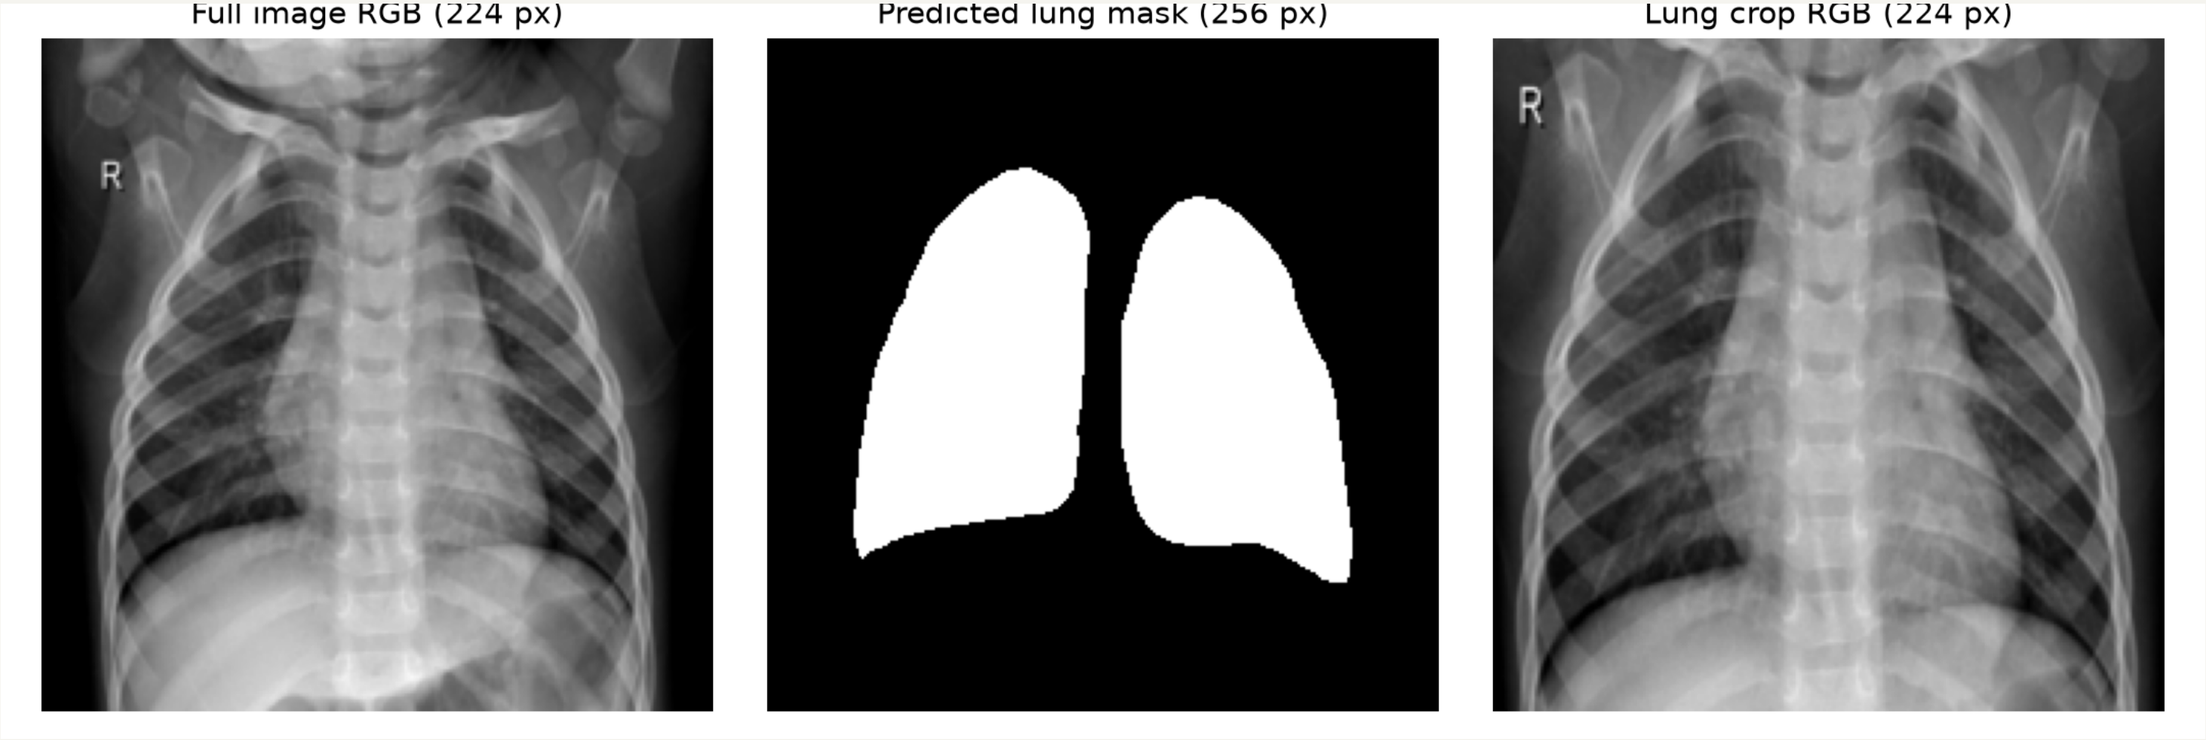

Online 5

93.75%

Final pilot

Historical runs used different settings.

Lung-focused input

CNN + **Transformer**

Two pretrained image readers

Four matched comparisons

	Full image	Lung crop
CNN	A **86.86%**	B **92.63%**
CNN + ViT	C **88.14%**	D **93.75%**

Same split. Five classifier-head epochs.

Final model results

93.75%

Accuracy

585 / 624 images correct

98.21%

Pneumonia recall

383 / 390 pneumonia cases found

---

32 false alarms

7 missed cases

Mistakes and limits

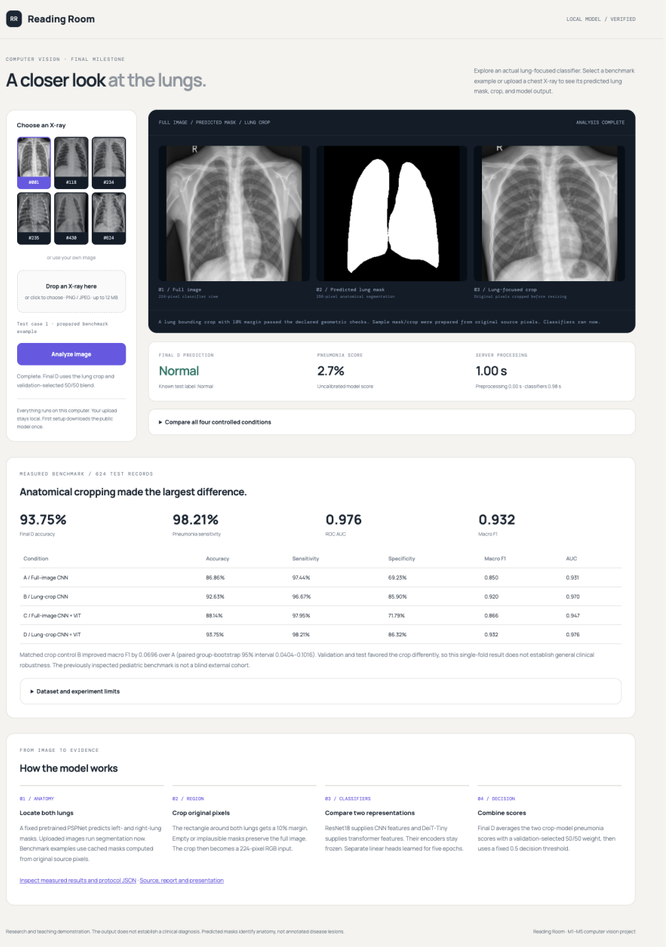

False alarm

Missed pneumonia

Validation and test disagreed.
